

Attorney Docket No.: CW-01-040130

REMARKS

Reconsideration and further examination of this application is respectfully requested.

The indication of allowable subject matter by the Examiner is greatly appreciated. Claim 1 has been amended to include the allowable subject matter of claim 3. Hence, claim 3 was cancelled without prejudice. Claims 2, 5 through 15 have been amended and all depend variously from claim 1. Claim 16 was amended to include the allowable subject matter of claim 18 to place claim 16 in condition for allowance. Hence claim 18 was cancelled without prejudice. Claims 17 and 19 variously depend from claim 16 and are allowable for the same reasons as claim 16. Claim 20 was amended to include the same allowable subject matter. Claim 21 has been added and is dependent from claim 20. Therefore, claim 21 is considered to be allowable for the same reasons as claim 20.

The drawings were objected to by the Examiner that the heat sink, as claimed in claim 6, is not shown in the drawings. Paragraph 0032 indicates that a heat sink 48 is shown in figure 1. As illustrated in figure 1, the heat sink 48 is diagrammatically shown in figure 1. For these reasons, Applicants consider figure 1 to adequately illustrate the use of a heat sink 48. For this reason, figure 1 has not been further modified.

Applicants have reviewed the art made of record and considers the Applicants' claims to be patentable over the cited art.

For these reasons, claims 1, 2 and 5-21 are considered to be patentable over the prior art. Therefore, this application is now considered to be in condition for allowance and such action is earnestly solicited.

Dated this 18th day of November 2005.
